# LET YOUR IMAGINATION TAKE FLIGHT!

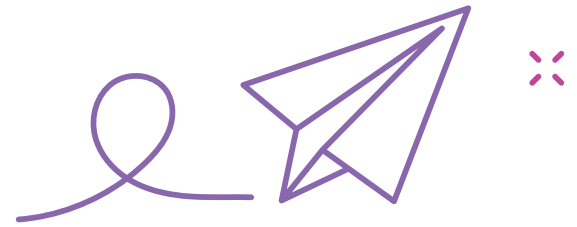

**HAROLD  
AND THE  
PURPLE  
CRAYON**

IN CINEMAS  
**SEPTEMBER 26**

In **HAROLD AND THE PURPLE CRAYON**, Harold draws a plane and takes flight! Let your imagination fly high with this DIY paper airplane craft. Ready for take-off?

## SUPPLIES

- One sheet of 8.5 x 11-inch paper (regular printer paper works great!)
- Markers, crayons, or colored pencils for decorating. Purple crayons work extra well to make your design come to life

## INSTRUCTIONS

### 1. Decorate the Outside of Your Plane

Before you start folding, grab your markers, crayons, or colored pencils and go wild! Let your imagination flow and draw anything you like on one side of the paper. Feel free to use a purple crayon so your plane looks like Harold's! This will be the outside of your airplane.

### 2. Fold Your Paper in Half

Fold your paper in half the long way, like a hot dog bun. Press down to make a nice, sharp crease, and then open it back up.

### 3. Narrow the Nose

- ✂️ Fold the top two corners down to the middle crease. You should now have a pointy top, like a house with a steep roof.

### 4. Shape the Nose

Fold those top edges down to the middle crease again, making the nose of your airplane extra pointy and ready to fly!

### 5. Fold in Half

Fold your paper in half along the original middle crease. Now it should look like a long, narrow triangle.

### 6. Adjust the Wings

- Lay your airplane on its side so the long edge is facing you
- Fold one side down to make a wing, starting from the pointy nose and folding towards the bottom
- Flip it over and do the same thing on the other side to make the second wing

### 7. Adjust Your Wings

Make sure your wings are even and stick out a bit like a real airplane's wings. They should tilt up just a little bit to help it glide.

### 8. Add More Decorations

Now's the time to add any final touches to your plane.

### Ready, Set, Go!

Hold your paper airplane by the bottom and give it a good throw. Watch it soar through the air! How far can it go?
